Tools: Visual Studio Code, Microsoft SQL server, Sublime Text.

Soft Skills: Communication, Planning, Analytical, Problem Solving, Decision Making, Flexible.

Projects

Magic Match Game github.com/Rishabh-Gupta

- Developed a Memory Matching Game: Designed and implemented a memory matching game using **React** and **JavaScript**, incorporating features such as card shuffling, choice handling, and turn tracking.
- Enhanced User Interaction and Experience: Created a responsive user interface with **CSS** for styling, providing real-time feedback on card selections and game progress. Integrated a mechanism for card matching and reset logic to ensure smooth gameplay and user engagement.

iTask - A Todo-List app github.com/Rishabh-Gupta

- Developed a To-Do List Application: Created a dynamic to-do list application using **React** and **Tailwind CSS**, managing state with **Hooks** and incorporating local storage for persistent data storage.
- Implemented Interactive Features: Added functionalities including adding, editing, deleting, and marking tasks as completed, along with toggle options to display finished tasks.

Translator app github.com/Rishabh-Gupta

- Developed a **React** application that integrates MyMemory API for real-time text translation and features text-to-speech and clipboard functionalities.
- Enabled dynamic language selection and seamless user interaction for translating and listening to text.

Data Cleaning in SQL Server Management Studio github.com/Rishabh-Gupta

- Developed a structured methodology for cleaning Nashville housing data.
- Utilized SQL scripts for standardizing formats, handling missing values, and removing duplicates.
- Provided a sample dataset and clear instructions for executing code.

Certifications and Achievements

Root Cause Renegade : Participated in a Hackathon with team where we Developed a strategic approach to tackle stagnant revenue and complex market challenges, aiming to achieve a revenue target of Rs 1000 crores within five years.

Product Alchemy Case Study: Participated in a Hackathon with a team where we created a GTM strategy to triple ARR for a low-code SaaS platform by expanding into US, EU, and LatAm markets using Product-Led Growth and Sales.
